

# OLIMOV JAMSHIDBEK

Fergana, 150100, Uzbekistan  
+998-90-777-04-04 | jambek1057121@gmail.com

## CAREER SUMMARY:

A dedicated 3rd-year Electrical Engineering student with a cumulative GPA of 3.88/4.00. Possesses strong expertise in automatic control theory, electrical machines, and sustainable energy systems. Highly motivated to apply advanced automation principles to the field of modern photonics and eager to contribute to research that increases energy efficiency in smart grid systems.

## WORK EXPERIENCE:

EcoTech Club, Fergana State Technical University

- Team Leader of Scientific Projects. Led a multidisciplinary student team to design innovative engineering and environmental solutions. Directed the logistics and academic promotion of regional student expeditions.

Multilingual Ecological Dictionary Project

- Co-Author & Web Developer. Collaborated on a comprehensive academic dictionary containing 1,500 to 5,000 terms in Uzbek, Russian, and English. Leading the digital transition by developing and managing the official platform: ecoglassary.uz.

"Smart Trash Can" Startup Project

- Hardware & Software Developer. Developed an automated waste management prototype based on sensor integration and microcontroller programming. Designed optimized electrical circuits to ensure low power consumption.

## PUBLICATIONS:

- Olimov, J. (2026). "Farg'ona viloyati sharoitida quyosh va shamol energiyasidan foydalanish istiqbollari." InLibrary / Youth in Science.
- Olimov, J. (2026). "Qayta tiklanuvchi energiya manbalaridan foydalanishda innovatsion texnologiyalarning o'rni." In-Academy / Youth of Today.
- Olimov, J. (2026). "Product Certification Process: Uzbekistan, Europe, Asia, and the Experience of CIS Countries (2010-2025)".

## EDUCATION:

2023 – 2026 (Expected) | Fergana State Technical University

Bachelor of Science in Electrical Engineering, Electrical Mechanics and Electrical Technologies

Key Coursework: Theoretical Electrical Engineering, Automatic Control Theory, Electric Machines, Operation of Renewable Energy Devices.

## SKILLS:

- Electrical Circuit Design
- Control Systems & Sensor Integration
- Python (Data processing)
- Power BI & Google Sheets
